1

There is a castle on the top of **1** hill. A path leads to it, which is illuminated by **1** moon. A wolf is howling mournfully at the moon. In the woods beneath the hill hides a scary bugaboo. How many wolves can you see?

Find 1 hidden bugaboo.

Sim

In the knight's hall of the castle, there are 7 suits of armour for 7 knights, and there are 7 sharp swords and 7 long spears. On the walls hang the keys to the 7 locks of the mysterious treasure chamber. How many keys can you count?

Where are the 7 bugaboos?

Picture a spooky abandoned castle. There is nobody inside, just you. In the distance you occasionally hear the cawing of a croaky raven, an owl is hooting, and a cackling witch swoops over on a broom. Are you feeling a little jumpy? And there's worse to come when you discover that bugaboos hide in the dark corners of the castle. Look carefully and see if you can find and count them all. Go on ... there's nothing to worry about! Bugaboos look scary, but they won't bite you. It's a great way of learning to count. So, let's begin ... one, two, three ... what comes after three?
